Terahertz radiation - also known as submillimeter radiation, terahertz waves, tremendously . Submillimeter waves are used in physics to study materials in high magnetic fields, since at high fields (over about 11 tesla), the electron spin.

Terahertz Physics

The Terahertz Physics Group studies phenomena that occur at extremely high frequencies in the so-called terahertz (THz) region from about 1 to 30 THz.

Written in a clear and consistent style, the book Terahertz Physics on an understanding of fundamental physical principles at terahertz frequencies and their applications. Absorbed photo density in either NbN film or NbN metamaterial is estimated and used Terahertz Physics understand the mechanism of nonlinear response. In this paper, we present a Monte Carlo-based global kinetic approach, suitable for the investigation of a combined carrier-phonon nonequilibrium dynamics in realistic devices, and discuss its application with a prototypical resonant-phonon THz emitting quantum cascade laser design.
